List of Contents

NUMBER 1

A. Tutar and **N. Kuruoğlu**	1	The Steiner formula and the Holditch theorem for the homothetic motions on the planar kinematics
C. E. English and **D. Russell**	7	Mechanics and stiffness limitations of a variable stiffness actuator for use in prosthetic limbs
Chad English and **Donald Russell**	27	Implementation of variable joint stiffness through antagonistic actuation using rolamite springs
Y. Zhang and **Z. Fang**	41	Analysis of tooth contact and load distribution of helical gears with crossed axes
Albert Castellet and **Federico Thomas**	59	Characterization of the self-motion set of the orthogonal spherical mechanism
J. I. Pedrero, A. Rueda and **A. Fuentes**	89	Determination of the ISO tooth form factor for involute spur and helical gears
Chen Dar-Zen and **Wang Shinn-Chang**	105	Dynamic modeling of geared robotic mechanisms—The virtual link approach
F. L. Litvin, Jian Lu, D. P. Townsend and **M. Howkins**	123	Computerized simulation of meshing of conventional helical involute gears and modification of geometry
Sen Dibakar and **T. S. Mruthyunjaya**	149	A computational geometry approach for determination of boundary of workspaces of planar manipulators with arbitrary topology

NUMBER 2

Q. Tu and **J. Rastegar**	171	On the inherent characteristics of the dynamics of rigid link robot manipulators
J. K. Davidson and **K. D. Chaney**	193	A design procedure for RPR planar robotic workcells: an algebraic approach
Frederic Boyer and **Wisama Khalil**	205	Kinematic model of a multi-beam structure undergoing large elastic displacements and rotations. Part one: model of an isolated beam
Frederic Boyer and **Wisama Khalil**	223	Kinematic model of a multi-beam structure undergoing large elastic displacements and rotations. Part two: kinematic model of an open chain

A. A. Olędzki, I. Siwicki and **J. Wiśniewski**	243	Impact dampers in application for tube, rod and rope structures
L. Tancredi and **M. Teillaud**	255	Application de la géométrie synthétique au problème de modélisation géométrique directe des robots parallèles
F. G. Kong, Q. Li and **W. J. Zhang**	271	An artificial neural network approach to mechanism kinematic chain isomorphism identification
Su Hai Jun, Liao Qi Zheng and **Liang Chong Gao**	285	Direct positional analysis for a kind of 5–5 platform in-parallel robotic mechanism
Ramahi Ahmed and **Tokad Yilmaz**	303	On the third-order finite screw system: General displacement of a line
Yan Hong-Sen and **Cheng Wen-Teng**	319	Curvature analysis of spatial cam-follower mechanisms
	341	Book Review

NUMBER 3

S. L. Canfield, R. R. Soper and **C. F. Reinholtz**	345	Velocity analysis of parallel manipulators by truss transformations
G. Legnani, B. Zappa, R. Adamini and **F. Casolo**	359	A contribution to the dynamics of free-flying space manipulators
D. Chakarov	373	Study of the passive compliance of parallel manipulators
Sen Dibakar and **T. S. Mruthyunjaya**	391	Synthesis of workspaces of planar manipulators with arbitrary topology using shape representation and simulated annealing
E. Chicurel	421	A 180° steering interval mechanism
Jiegao Wang and **Clément M. Gosselin**	437	Static balancing of spatial three-degree-of-freedom parallel mechanisms
Der-Ming Ku	453	Direct displacement analysis of a Stewart platform mechanism
Shean-Juinn Chiou and **Sridhar Kota**	467	Automated conceptual design of mechanisms
F. Bulca, J. Angeles and **P. J. Zsombor-Murray**	497	On the workspace determination of spherical serial and platform mechanisms

NUMBER 4

Shiva Shankar	513	Singularities in mechanisms II—trajectory tracking in the 3-axis wrist
M. Fayet and **J. P. Brossard**	527	On the designation of joints
Yong Chen and **Jinyuan Fu**	549	A computational approach for determining location of Burmester solutions with fully rotatable cranks
J. M. Rico, J. Gallardo and **J. Duffy**	559	Screw theory and higher order kinematic analysis of open serial and closed chains
Osman Gürsoy and **Ahmet Küçük**	587	On the invariants of trajectory surfaces
G. R. Dunlop and **T. P. Jones**	599	Position analysis of a two DOF parallel mechanism—the Canterbury tracker
Peter Kovács and **Günter Hommel**	615	An algorithm for the kinematic analysis and optimal input joint assignment of recursive mechanisms
Yong Sheng Zhao, Ling Lu, Tie Shi Zhao, Yong Hui Du and **Zhen Huang**	637	The novel approaches for computing the dynamic load-carrying capacity of multiple cooperating robotic manipulators
C. Y. Wang	645	Asymptotic formula for the flexible bar
Herman Bruyninckx	657	Forward kinematics for Hunt–Primrose parallel manipulators

NUMBER 5

Selected Papers from the NATO Advanced Study Institute on Computational Methods in Mechanisms, 16–28 June 1997, in Varna, Bulgaria

T. E. Shoup	vii	Editorial
T. Klisch	665	Contact mechanics in multibody systems
D. A. Ruth and **J. M. McCarthy**	677	The design of spherical 4R linkages for four specified orientations
V. Brodsky and **M. Shoham**	693	Dual numbers representation of rigid body dynamics
J. M. Hervé	719	The Lie group of rigid body displacements, a fundamental tool for mechanism design
F. C. Park, Jihyeon Choi and **S. R. Ploen**	731	Symbolic formulation of closed chain dynamics in independent coordinates
Q. Sun, I. Sharf and **M. Nahon**	753	Stability analysis of the force distribution algorithm for flexible-link cooperating manipulators

J. L. Escalona, J. Mayo and J. Dominguez 765 A new numerical method for the dynamic analysis of impact loads in flexible beams

J. R. Phillips 781 Some geometrical aspects of skew polyangular involute gearing

D. Y. Pogorelov 791 On numerical methods of modeling large multibody systems

NUMBER 6

Bhaskar Dasgupta and Prasun Choudhury 801 A general strategy based on the Newton–Euler approach for the dynamic formulation of parallel manipulators

Jae Won Jeong, Soo Hyun Kim and Yoon Keun Kwak 825 Kinematics and workspace analysis of a parallel wire mechanism for measuring a robot pose

Hajrudin Pasic, R. L. Williams and Chunwu Hui 843 A numerical algorithm for solving manipulator forward dynamics

Ying-Chien Tsai and Wern-Kueir Jehng 857 A kinematics parametric method to generate new tooth profiles of gear sets with skew axes

Y. Zheng, Z. Z. Han, P. R. Moore and Q.-H. Max Meng 877 The design of time-optimal control for two-wheel driven carts catching a target trajectory

F. L. Litvin, Aoyong Peng and Anngwo Wang 889 Limitation of gear tooth surfaces by envelopes to contact lines and edge of regression

I. Esat and H. Bahai 903 A theory of complete force and moment balancing of planer linkage mechanisms

Miomir K. Vukobratović and Veljko Potkonjak 923 Dynamics of contact tasks in robotics. Part I: general model of robot interacting with environment

Potkonjak Veljko, Miomir K. Vukobratović and Vladimir Matijević 943 Dynamics of contact tasks in robotics. Part II: case study in dynamics of contact motion

NUMBER 7

L. Mangialardi and G. Mantriota 973 Power flows and efficiency in infinitely variable transmissions

Z. Yang and J. P. Sadler 995 A one-pass approach to dynamics of high-speed machinery through three-node lagrangian beam elements

P. B. Goldsmith	1009	Global asymptotic stability of hybrid position/force control applied to compliant unilateral constraints
L.-I. Wu, S.-H. Wu and **H.-S. Yan**	1023	Simplified graphical determination of disk-cam curvature
L. Romdhane	1037	Design and analysis of a hybrid serial-parallel manipulator
J. J. Cervantes-Sánchez and **J. G. Rendón-Sánchez**	1057	A simplified approach for obtaining the workspace of a class of 2-dof planar parallel manipulators
M. K. Özgören	1075	Kinematic analysis of a manipulator with its position and velocity related singular configurations
K. Wohlhart	1103	Degrees of shakiness
M.-Y. Lee, A. G. Erdman and **S. Faik**	1127	A generalized performance sensitivity synthesis methodology for four-bar mechanisms

NUMBER 8

V. H. Arakelian and **M. R. Smith**	1141	Complete shaking force and shaking moment balancing of linkages
Jing Zhao and **Shi-Xian Bai**	1155	Load distribution and joint trajectory planning of coordinated manipulation for two redundant robots
Z. Huang, Y. S. Zhao, J. Wang and **J. J. Yu**	1171	Kinematic principle and geometrical condition of general-linear-complex special configuration of parallel manipulators
Ö. Köse	1187	A method of the determination of a developable ruled surface
S. Mitsi	1195	Position analysis in polynomial form of planar mechanisms with a closed chain of the Assur group of class 4. L'analyse de position sous forme polynomiale des mecanismes plans avec une chaine fermee du groupe d'Assur de 4-eme classe
Mansour A. Karkoub, Osama E. Gad and **Mahmoud G. Rabie**	1211	Predicting axial piston pump performance using neural networks
M. Çelik	1227	Comparison of three teeth and whole body models in spur gear analysis
L. Půst, F. Peterka, G. Stépán, G. R. Tomlinson and **A. Tondl**	1237	Nonlinear oscillations in machines and mechanisms theory

M. Yashima and **H. Yamaguchi** 1255 Control of whole finger manipulation utilizing frictionless sliding contact—theory and experiment

Tie-Shi Zhao, Yong-Sheng Zhao and **Z. Huang** 1271 Study on adaptability of a sea crab and its bionics mechanism model

Zhao-Hui Jiang and **A. A. Goldenberg** 1281 Task space trajectory control of flexible micro–macro robot in the presence of parametric uncertainty

Zhao-Hui Jiang and **A. A. Goldenberg** 1303 Dynamic compensability and compensability measure for robot systems with structural flexibility
